DETAILED ACTION

Response to Arguments

Applicant's arguments, see Remarks, filed 10 January 2006, with respect to the rejection(s) of claim(s) 1-4, 30, 31, 39-43, 48, and 49 under 35 U.S.C. 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of 35 U.S.C. 101. Based on an updated review of claims 1-53, it has been determined that they are unpatentable since they recite non-statutory subject matter for the reasons discussed below. The Examiner apologizes that these issues were not raised at an earlier point in the prosecution.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-53 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims simply recite an abstract manipulation of data, and thus fail to produce a useful, concrete, and tangible result. Specifically, the estimating of the purchases made by the customers from the other suppliers (as set forth in independent claims 1, 30, 39, and 43) is simply an abstract manipulation of data since it produces no physical transformation and no tangible result. None of the respective dependent claims recite limitations that would render a tangible result.
